Farhad Lafarie

DEVOPS ENGINEER | CI/CD, LINUX & AUTOMATION

+94 77 635 0933 | Dehiwala 10350, Sri Lanka | farhadlafarie@gmail.com | in/farhad-lafarie | git/lafarie | portfolio

SUMMARY

DevOps Engineer and Software Engineering undergraduate with hands-on experience in automating CI/CD pipelines, scripting with Python and Bash, and managing Linux-based infrastructure. Currently employed as a Trainee DevOps Engineer at hSenid Mobile Solutions, working daily with Docker, Kubernetes, GitLab CI/CD, and monitoring tools such as Grafana and Sentry. Experienced in building full-stack web and mobile applications using Next.js, Node.js, and React Native. Strong foundation in cloud technologies, automation, collaborative problem-solving, and a proven track record of directing teams in hackathons and coding competitions.

EDUCATION

BENG (HONS) SOFTWARE ENGINEERING **2022 - Present**

Informatics Institute of Technology affiliated with University of Westminster, UK

EXPERIENCE

TRAINEE DEVOPS ENGINEER **September 2024 - Present (1 year 5 months)**

hSenid Mobile Solutions | 3rd Floor, 320 T. B. Jayah Mawatha, Colombo 01000

- Systematized CI/CD builds and deployments using GitLab CI/CD, reducing release cycle time from 2 hours to 15 minutes (87% reduction) and developed 8+ automation scripts in Python and Bash, eliminating 10+ hours of repetitive tasks weekly.
- Orchestrated containerized applications using Docker and Kubernetes, enabling 40% faster scaling and supporting 3+ production deployments monthly on AWS with zero critical downtime.
- Deployed Sentry and Grafana monitoring dashboards, reducing mean time to detect errors from 4 hours to 12 minutes and improving issue resolution velocity by 60% across production services.
- Constructed containerized build pipeline with Docker (2-5 containers) for appiGo Retailer eCommerce platform, delivering 2 production builds monthly with 99.9% uptime and Apache web server optimization.

Skills Used: Docker, Kubernetes, GitLab CI/CD, AWS, Linux, Python, Bash, Grafana, Sentry, Ansible

PROJECTS

TICKET PORTAL - EVENT TICKETING PLATFORM (ticket.rush.lk) 2025

- Architected a production ticketing platform hosting 5+ live events, generating $3000+ in ticket sales, containerized with Docker and deployed via streamlined GitLab CI/CD pipelines, achieving zero-downtime releases for 1000+ paying customers.
- Published the app to Android and iOS stores, enhancing cross-platform functionality with React Native.

Skill Used: Next.js, Prisma, PostgreSQL, Docker, GitLab CI/CD, Tailwind CSS, React Native, Monorepo Architecture

SHEET NINJA - GITLAB-SHEETS SYNC PLATFORM (github) 2025

- Built an enterprise-grade bidirectional sync platform between Google Sheets and GitLab with 6+ integrations, featuring a streamlined 6-step setup wizard, encrypted credentials, and Docker-based deployment enabling teams to sync 1000+ records safely with 99.9% uptime.

Skill Used: Next.js, TypeScript, Prisma, PostgreSQL, Docker, NextAuth.js, Zustand, GitLab REST API, CI/CD

APPIGO RETAILER - ECOMMERCE WEBSITE BUILDER (appigo.co/stores) 2024 - Present

- Architected containerized build pipeline with Docker (2-5 containers) for production eCommerce platform, delivering 2 release builds monthly across staging and production environments with 99.9% uptime; optimized Apache web server configuration, reducing response time by 35% and supporting 50,000+ concurrent requests per minute.

Skill Used: Docker, GitLab CI/CD, Apache, Linux, Bash, Build Automation

AIDUCATOR - AI-POWERED 3D ELEARNING PLATFORM (live demo) 2024

Directed a team of 6 engineers in a year-long project to research, design, and deploy an AI-powered eLearning platform serving 500+ students with ChatGPT-based tutoring, 3D model viewer with 50+ models, and personalized video recommendations; established Sentry error tracking across 3 environments, reducing mean time to resolution (MTTR) by 45%.

Skill Used: React.js, Node.js, MySQL, ChatGPT API, Google Model Viewer API, Express.js, Sentry, REST API

CERTIFICATION

- React Certification - LinkedIn Learning **2024**
- NASA Space Apps Challenge - Global Nominee **2024**
- Tech Triathlon - Rootcode **2024**
- Problem Solving International Hackathon - University of Westminster **2024**
- CodeSprint - IEEE **2023 & 2024**

SKILLS

Hard Skills

Technical Skills

Programming Languages: Python, Bash, JavaScript, Java, PHP
Frameworks: React, React Native, Next.js, Node.js, Express.js, FastAPI, JAX-RS
DevOps & Cloud: Docker, Kubernetes, GitLab CI/CD, AWS (EC2), Linux, Ansible
Monitoring & Logging: Grafana, Sentry
Container & Orchestration: Docker, Kubernetes, Docker Compose, Harbor, AWS
CI/CD Tools: GitLab CI/CD, GitHub Actions
Version Control: Git, GitHub, GitLab, Git Workflows, Branching Strategies
Databases: PostgreSQL, MySQL, MongoDB, Prisma ORM
Other: REST API, Microservices, Firebase, GCP, Tailwind CSS, Figma

EXTRACURRICULAR ACTIVITIES

- Problem Solving International Hackathon 24 by University of Westminster - Participation (100+ competitors) **2024**
- IIT CodeSprint – Guided a team of 5 engineers to Top 10 (out of 150+) teams **2024**
- Member of IEEE Student Branch of IIT (200+ members) **2023 - Present**
