SUMMARY

DevOps-leaning software engineering student. Day job is Trainee DevOps Engineer at hSenid Mobile Solutions: GitLab CI/CD, Docker, a bit of Kubernetes, Linux servers, and monitoring with Grafana and Sentry. I script the boring stuff in Python/Bash so humans don't have to. Also build full-stack apps when needed (Next.js, Node, React Native) — useful when “just fix the pipeline” turns into “fix the app, too.”

EDUCATION

BENG (HONS) SOFTWARE ENGINEERING

2022 - Present

Informatics Institute of Technology affiliated with University of Westminster, UK

GCE ADVANCED LEVEL (A/L)

2021

Completed / Passed

GCE ORDINARY LEVEL (O/L)

2018

Completed / Passed

EXPERIENCE

TRAINEE DEVOPS ENGINEER

September 2024 - June 2026

hSenid Mobile Solutions | Colombo, Sri Lanka

Maintain and improve GitLab CI/CD for the products I touch — fewer red builds, clearer stages, and releases that used to burn a long afternoon often finish much sooner once the pipeline is doing the heavy lifting.

Automate repeat work with Python and Bash scripts; packages and deploys involve Docker regularly, and Kubernetes where the team runs on it (AWS).

Set up and look after Grafana and Sentry so we notice bad deploys and runtime errors early, not days later from a support ticket.

Own the containerized build/release path for appiGo Retailer — stage first, then production — and chip away at Apache/server config when response times get painful.

Skills Used: Docker, Kubernetes, GitLab CI/CD, AWS, Linux, Python, Bash, Grafana, Sentry, Ansible

PROJECTS

STOREDECK - COMMERCE MONOREPO (DEPLOY + DATA PATH)

2026

Two Next.js apps (merchant + public portal) in a Turbo monorepo, Postgres + Prisma multi-tenant shops, Redis for cache/rate limits. Wrote the ops notes for running it on AWS EC2 (Mumbai) and kept soft-delete so deletes don't trash audit history.

Care more about “can we redeploy cleanly” than buzzwords: separate envs, Turbo pipelines, and docs someone else can follow at 2 a.m.

Skill Used: Next.js, Turbo, Prisma, PostgreSQL, Redis, AWS EC2, Docker-friendly setup, CI/CD

TICKET PORTAL - EVENT TICKETING PLATFORM (serendisco.rush.lk)

2025 - 2026

With hSenid Mobile Solutions.

Helped run the production ticketing stack for live events — Docker images, GitLab deploy pipeline, night-of QR validation. Real events used it; real tickets sold.

Built the React Native door scanner for that stack ([play store](#)) and shipped companion apps for phone platforms.

Skill Used: Next.js, Prisma, PostgreSQL, Docker, GitLab CI/CD, React Native

SHEET NINJA - GITLAB ↔ SHEETS SYNC ([github](#))

2025

Side project: keep GitLab and Google Sheets in sync without copy-paste. Multiple connectors, Docker deploy, setup wizard, credentials encrypted. Useful when PMs live in Sheets and engineers live in GitLab.

Skill Used: Next.js, TypeScript, Prisma, Docker, GitLab REST API, CI/CD

2024 - Present

APPIGO RETAILER - ECOMMERCE STORE BUILDER (appigo.co/stores)

With hSenid Mobile Solutions.

Main ops touchpoint: Docker builds through GitLab, stage then prod. When Apache is the bottleneck, dig into config and load behavior instead of guessing. Write the steps down so deploys aren't tribal knowledge.

Skill Used: Docker, GitLab CI/CD, Apache, Linux, Bash

AIDUCATOR - 3D ELEARNING APP ([live demo](#)) 2024

Student team project (six of us) with ChatGPT tutoring and a 3D model viewer. My share of “make it reliable”: Sentry on the environments we used so we could fix crashes with a stack trace instead of a screenshot.

Skill Used: React, Node.js, MySQL, ChatGPT API, Express, Sentry

CERTIFICATION

- | | |
|--|------|
| • React Certification - LinkedIn Learning | 2024 |
| • Learning Kubernetes - LinkedIn | 2026 |
| • DevOps Foundations: Infrastructure as Code - LinkedIn | 2026 |
| • Microsoft Certified: Azure AI Fundamentals (AI-900) | 2025 |
| • NASA Space Apps Challenge - Global Nominee | 2024 |
| • Tech Triathlon - Rootcode | 2024 |
| • Problem Solving International Hackathon 2024 - University of Westminster | 2024 |
| • CodeSprint 7.0 - IEEE Computer Society Student Branch Chapter of IIT | 2024 |
| • SkillUp - Professional Development Programme - Leo Club of IIT | 2023 |

SKILLS

Hard Skills

Languages: Python, Bash, JavaScript, Java, PHP | **App tooling:** React, React Native, Next.js, Node.js, Express |

Ops: Docker, Kubernetes, Docker Compose, GitLab CI/CD, GitHub Actions, AWS (EC2), Linux, Ansible, Harbor |

Observability: Grafana, Sentry | **Data:** PostgreSQL, MySQL, MongoDB, Prisma |

Also: Git/GitLab workflows, REST APIs, shell automation

EXTRACURRICULAR ACTIVITIES

- | | |
|--|----------------|
| • Helped at the Rotary Club Sunshine Games with workmates — gates, setup, running around so the day works. | 2025 |
| • IEEEExtreme 18.0 with Dhanuka Perera — 24-hour programming contest. | 2024 |
| • Member of the IEEE Student Branch at IIT | 2023 - Present |
